

PMC-Sierra® is the premier Internet infrastructure semiconductor solution provider, offering semiconductor solutions for Enterprise and Channel Storage, Wide Area Network Infrastructure, Fiber To The Home, and Laser Printer/Enterprise market segments. PMC-Sierra offers its customers technical and sales support world-wide through a network of offices in North America, Europe, Israel and Asia.

Channel Storage

The Adaptec by PMC brand resulted from PMC-Sierra's acquisition of the channel storage business from Adaptec in 2010, including Adaptec's RAID storage product line, a well-established global value-added reseller customer base, board logistic capabilities, and leading SSD cache performance solutions. The acquisition of Adaptec's channel storage business underscores PMC-Sierra's commitment to refreshing and revitalizing the Adaptec by PMC brand, as well as continuing its focus on providing leading-edge storage solutions that help PMC-Sierra channel partners build existing accounts and win new business.

Time-tested Results

For nearly three decades, Adaptec by PMC storage products have set the standard in storage solutions that protect data, maximize system performance, improve energy-efficiency, and reduce capital and operating expenses in today's most demanding storage environments.

Recognized globally as a leader in storage technology and solution innovation, Adaptec by PMC storage products are used in IT environments such as:

- Cloud Computing
- Data Center
- Green IT
- Networking
- Storage
- Video
- Virtualization

Adaptec's Data Conditioning Platform is at the core of every Adaptec by PMC storage product to protect, accelerate, optimize and condition data as it moves through the I/O path. Adaptec by PMC software and hardware-based solutions are delivered through leading resellers, system builders and integrators worldwide to provide storage connectivity, data protection, and networked storage to enterprises, government organizations, medium and small businesses worldwide.

Innovations such as maxCache SSD Cache performance Solutions, Hybrid RAID, Zero-Maintenance Cache Protection, and Intelligent Power Management solutions demonstrate PMC-Sierra's dedication to advancing I/O performance while integrating additional controller-based system functionality beyond RAID.

Additionally new Adaptec by PMC storage products are powered by PMC-Sierra's industry-proven, multi-core SRC 8x6G RAID-on-Chip (ROC) chip technology, starting with the Adaptec by PMC Series 6 family of controllers – the industry's first 6Gb/s Unified Serial RAID Controller with Zero-Maintenance Cache Protection.

Adaptec by PMC Channel Storage Product Portfolio

- **Series 6:** SAS 2.0 and Gen 2 PCIe serial RAID controllers
- **Series Q:** maxCache enabled serial RAID controllers
- **Series 5Z:** Zero Maintenance Cache Protection RAID controllers
- **Series 5:** 4-port to 24-port serial RAID controllers
- **Series 3:** 1st generation serial RAID controllers
- **Series 2:** Entry level serial RAID controllers
- **Series 1:** Economical serial HBA

PMC-Sierra at a Glance

- The premier Internet infrastructure semiconductor solution provider.
- PMC-Sierra's semiconductor solutions are used in communications network infrastructure equipment that enables the high-speed transportation and storage of large quantities of digital data in a secure manner.
- Publicly traded on the NASDAQ Stock Market under the PMCS symbol.
- Purchased Adaptec's channel storage assets in June 2010; rebranded as Adaptec by PMC.

Adaptec by PMC at a Glance

- Key technologies: caching, tiering, and intelligent power management
- The Adaptec maxCache SSD Caching Series offers 8X Faster IOPS and up to 70% cost savings. Strong global customer relationships; and channel expertise
- Includes legacy 3G SAS RAID storage product line
- Launched the Series 6 6Gb/s SAS RAID controller for the Channel in April 2011
